

B3 Cont an outwardly facing first abutment surface;

a second housing defining a bore of a shape similar to said exterior surface of said first housing and adapted to slideably receive said first housing therein;

A1 a second load bearing member coupled to said second housing and defining an outwardly facing second abutment surface opposite to said first abutment surface; [and]

biasing means for urging said first and second load bearing members away from one another in response to a load being imposed upon at least one of said first and second abutment surfaces; and

at least one slip lining positioned between said first housing exterior surface and a bore wall defining said second housing bore.

Claim 8

A2 Sub 8. (Amended) The assembly of claim 4 [further comprising:]
F37 wherein the compression spring includes:

at least two springs; and

a plate positioned between the springs, separating the springs from one another.

Claim 9

Please cancel claim 9.
